LittleSoft
Infinite Power from Beyond the Clouds

- ✓ You can create events with simple and easy operations
- ✓ Reschedule date and time with a single click
- ✓ Check events of everyone in your group and organization instantly with four views
- ✓ A comfortable user interface for iPhone is ready
- ✓ Select language (English, Japanese, Korean, Chinese (simplified characters)) and time zone for your environment

Features

Sophisticated user interface (UI)

LS Scheduler is developed based on the research of usability, visibility, and intuitive operations to provide great user experiences. The UI achieved compact and stress-free interface only with essential functionality by removing unnecessary operational steps.

Simple events registration and detailed events registration

By clicking any view, a pop-up window appears for simple schedule registration. You can change date and times of the event using Drag&Drop operation. Of course you can setup event details such as participants, equipments, categories, and more.

Mobile support

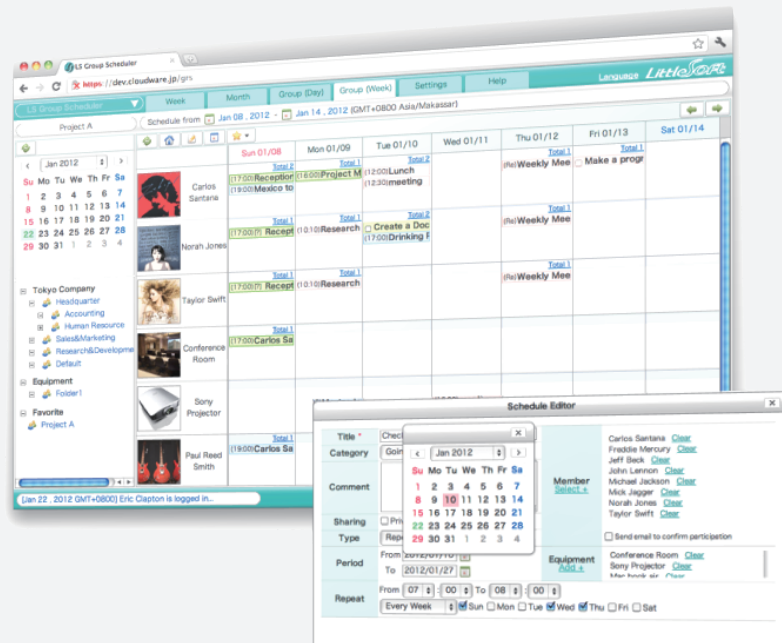

LS Scheduler provides a comfortable user interface has been developed for the iPhone. You can manage schedules of your group members from outside office.

Google Calendar Integration

LS Scheduler synchronizes with Google Calendar bidirectionally. By the integration with Google Calendar, you will be able to create a variety of custom views.

Powerful support for schedule management of groups and organizations

Hierarchical tree view displays structure of your organization. Four types of schedule views let you check schedules of everyone in your group instantly.
